

MAD Products Application Instructions

- Install MAD Products on fully cured concrete.
- Surface prep – Clean (pressure wash) concrete and allow to dry.

- **MAD BOND** Apply MAD Bond (roll or spray, saturate area to be covered) at 3mills thickness – covers 300 sq ft per gallon – Dying time 30 minutes.

- **MAD ARMOR** Apply MAD Armor (roll or spray evenly on area to be covered) at 22mills thickness – covers 50 sq ft per gallon – Drying time 1 to 4 hours.

- **MAD SHARK** Apply MAD Shark first coat (roll or spray evenly on area to be covered) at 22mills thickness – covers 50 sq ft per gallon – Drying time 1 to 2 hours.

- **MAD DEFENSE**
- Apply MAD Defense (roll or spray, saturate area to be covered) at 3mills thickness – covers 300 sq ft per gallon – Dying time 12 Hour.
- Note: Allow each step to dry between applications. At these specifications the material will reduce by half when drying. Overlap sections as needed to create a strong stable seam of the entire area.
